

HOW TO USE THIS GUIDE

The Guide has been published using the official GWEF language of English. The country sections are in alphabetical order in the English language. In each section there is a list of members telephone numbers. The listed members should be able to arrange emergency accommodation, tools etc. – if not themselves, then with another member who lives in his area. Each member is listed with a map reference, the nearest town/city (which will be marked on any good map of that country), his telephone number and details of languages spoken in addition to his national language. Also listed in each country section are useful phrases and normal national shopping hours. To use the phrases you should look at your own country section, check the number of the phrase you want, then say or show someone the phrase of the same number on the information page of the appropriate country. Also in the Guide is a list of the international telephone entry codes. We hope you find the information contained in the Guide to be useful. If you have any comments about the Guide, tell your International Representative who will tell the next GWEF-meeting.
